Natural dyes

Anna-Karoliina Tetri

Using traditional craft methods, it is possible to dye sustainably in an environmentally friendly way. You can use dyes from plants or soil to dye fabrics, wool or even wood.

The book describes the whole dyeing process from the gathering of materials to the mixing of the ingredients through to dyeing. The facilities and tools needed are also presented in depth. In addition to common dyeing materials the book also covers some exotic materials. The book is suited both for beginners and more experienced dyers.

Felting

Anna-Karoliina Tetri

Felting is a traditional craft which takes advantage of the felting properties of the wool fibres. Many kinds of warm, light and durable clothes and accessories as well as interior design items and utility articles can be made by felting.

This comprehensive handbook presents different felting techniques, describes different wool types and forms, needleloom felt, tops and carded wool batts. There is a detailed introduction to the combination of wool with other fibres and fabrics. This beautifully illustrated book has a wealth of instructions on how to make different clothes and accessories. The instructions are divided into five themes, and the garments are pictured on models. A pattern sheet is included with the book.

The author is a qualified artisan in textile design. She is also the author of the book *Natural Dyes* (Moreeni 2010).
